Summary

I am a Software Engineer based in Brasília, Brazil, with a bachelor's degree in Information Systems and a strong passion for Software Engineering. Currently, I work at SysMap Solutions, collaborating with a talented team to develop high-quality applications. By staying up to date with industry trends, I continuously enhance my ability to build robust, scalable, and efficient systems.

Experience

SysMap Solutions | Natura &Co   *Remote*

FULL-STACK DEVELOPER ANALYST   *Jun.2023 - Present*

- Contributed to authentication-related coding tasks at Natura&Co.
- Developed back-end implementations in Node.js with TypeScript, following TDD (Test-Driven Development) and DDD (Domain-Driven Design) principles, including writing unit tests to ensure high code quality.
- Worked on migrating an existing Java JSP application to a modern Node.js and React stack.
- Built new React front-end features based on Adobe XD designs, ensuring seamless integration with Java/Node APIs.
- Utilized Amazon Cognito and Oracle OAM for secure user authentication and authorization in the applications.
- Implemented AWS Lambda functions to enable serverless computing for back end services.
- Analysis of application logs using Kibana and Graylog tools to assist in resolving incident tickets.
- Developed and implemented automated testing frameworks for multiple AWS Lambda functions using TypeScript and Bash scripting, ensuring reliability, efficiency, and maintainability of serverless applications.
