*"As you think, so shall you become" - Lee Jun-fan.*

## Objective

My name is Gabriel Ribeiro, and I live in Brasília - Brazil. I have a major in C.S. and my main objective is to specialize in Software engineering. I am willing to learn any technology to hone my skills and gain experience. Therefore, I'm looking for an opportunity to get a job as a Software Engineer in an environment where I can constantly learn and enhance my knowledge in software development, and that will provide me with essential growth opportunities.

## Experience

**Liderlux**                                                                                                           *Brasília, Brazil*

INTERNSHIP                                                                                                                *2017 - 2018*

- Development, hosting, and maintenance of the company website using the technologies: HTML, CSS, Javascript and Bootstrap 3.
- Offered tech support.
- I helped in the reconfiguration of the network and maintenance of the company's servers. Windows Server 2012 R2.
- Ads Creation via Google AdSense.

## Education

**UNICEPLAC(Centro Universitário do Planalto Central Apparecido dos Santos)**              *Brasília, Brazil*

BACHELOR OF COMPUTER SCIENCE DEGREE                                                            *Fev. 2014 - Jul. - 2018*

- Computer Information Systems.

## Skills

| | |
|---|---|
| **Back-end** | Node.js, ExpressJS, Java, Spring Framework, REST API, MySQL, MongoDB, Docker |
| **Front-end** | HTML5, CSS, JavaScript, Typescript, React.js, React Native, Tailwind CSS, Bootstrap |
| **Languages** | Portuguese, English |

## Projects

**Parrot**                                                                                                                *Remote*

NODE.JS / JWT /RABBITMQ/ MONGODB / DOCKER / MINIO / REACT / REACT NATIVE                              *Dec. 2022*

- Full-stack application (Front-end, Back-end, and Mobile) of a social network called Parrot. There are also implementations of Swagger,containerization, buckets and message brokers.
- Repository Link: *github.com/bc-fullstack-02/Gabriel-Ribeiro*

**VUTTR - Very Useful Tools to Remember**                                                                  *Remote*

NODE.JS / JWT /EXPRESS / MONGODB/ DOCKER                                                                    *Nov. 2022*

- VUTTR is a tool manager. It was built using Node.js, JWT Authentication and Swagger Documentation API
- Repository Link: *https://github.com/Gahbr/vuttr-api*

**URL Shortener**                                                                                                        *Remote*

NODEJS, EXPRESS.JS, MONGODB                                                                                       *Aug. 2022*

- Microservice that receives a URL, shortens links and also redirects the page. To store the data, the NOSQL MongoDB database was used.
- Repository link: *github.com/Gahbr/URL-Shortener*
- Link: *shorten.up.railway.app*

**Sales Report**                                                                                                          *Remote*

JAVA - REACT.TS                                                                                                            *Jul. 2022*

- Application that makes a report of the sales made by the sellers, filtered according to the date chosen by the user and also with an option to send an SMS with the chosen seller's data.
- Repository link: *github.com/Gahbr/dsmeta*

### Covid tracker application

<span style="float:right">*Remote*</span>

Java Spring

<span style="float:right">*Jun. 2022*</span>

- Java Spring Boot application that track reported data of confirmed Coronavirus infections COVID-19 (2019-nCoV) around the world.
- Repository link: *github.com/Gahbr/covid-tracker-app*
- Link: *lnkd.in/dYcdPS86*

# Extracurricular Activities

### Programa Trainee SysMap de Excelência Full Stack | 2ª edição

<span style="float:right">*Remoto*</span>

Sysmap Solutions

<span style="float:right">*2022*</span>

- Trainee program for full-stack developer, where I worked with the following technologies: Programming logic, Data structures, HTML, CSS, Javascript, Typescript, Nodejs, SQL, MongoDB, React.js, ReactNative, RabbitMQ, MinIO, JWT, Swagger, Docker and Git.
- Projects developed throughout this course:
    - *github.com/bc-fullstack-02/Gabriel-Ribeiro*

### Back End Development and APIs

<span style="float:right">*Remote*</span>

FreeCodeCamp

<span style="float:right">*2022*</span>

- In the certification for APIs and back-end development, I learned to write back-end applications using Node.js and npm (Node Package Manager). I also built various web applications throughout the course using the Express framework, MongoDB, and the Mongoose library.
- Projects developed throughout this course:
    - *github.com/Gahbr/URL-Shortener*
    - *github.com/Gahbr/Exercise-tracker*
    - *github.com/Gahbr/Timestamp-Microservice*

### Dev For Tech

<span style="float:right">*Brazil - Remote*</span>

Gama Academy

<span style="float:right">*2022*</span>

- I was one of those selected to participate in the Dev for Tech program, which aims to attract, select and accelerate training in hard and soft skills for Junior developers. The program is divided into attraction and training phases, with synchronous and asynchronous classes, mentoring and a final integrative project that is carried out as a team.

### Philips Full-stack Developer | You Are You

<span style="float:right">*Brazil - Remote*</span>

Digital Innovation One

<span style="float:right">*2022*</span>

- Fullstack Java bootcamp.

### Programa START

<span style="float:right">*Brazil - Remote*</span>

Capgemini

<span style="float:right">*2022*</span>

- Java training program with a workload of 318 hours and I studied the following technologies: Logic programming, HTML/CSS, Javascript, jquery, Angular, Java, PostgreSQL

### Inter Frontend Developer

<span style="float:right">*Brazil - Remote*</span>

Digital Innovation One

<span style="float:right">*2021-2022*</span>

- Software development bootcamp in ReactJS, which is one of the main technologies used by the Digital bank Inter to create digital solutions working on web development projects and user interface components.

### Full Stack Developer Course

<span style="float:right">*Brazil - Remote*</span>

B7Web

<span style="float:right">*2020- In Progress*</span>

- I'm currently taking a fullstack developer course which includes several modules, i.e., HTML/CSS, Javascript, GIT/github, React, NodeJS, SQL.

### Introduction to programming + Java full course

<span style="float:right">*Brasília, Brazil*</span>

Eibneti

<span style="float:right">*2017 - 2018*</span>

- Backend Java course.
- Complementary course - HTML 3 + CSS 5.

### English Language Course

<span style="float:right">*Brasília, Brazil*</span>

Wizard by Pearson

<span style="float:right">*2009 - 2014*</span>

- .
